3.Wireless Mouse Use Guide

1)How to Use the Wireless Mouse

① Take out the USB receiver from the back of the mouse;

② Plug it into the USB interface of the computer or the device you need to use;

③ Power switch of mouse: down is use turn on，middle with light, up is turn off;

④ DPI button：1000-1600-2400-3200;

⑤ When the mouse power is low, the indicator will flash red light to remind you;

⑥ Use the 5V 2A charger (not incl-uded) and the attached charging cable for charging;

⑦ The red light will be on when the mouse is charged, and when the red light is off, it means the charging has been completed；

2)Battery Power Related

⑧ Mouse battery capacity: 500 mAh
⑨ Low battery reminder: Keyboard indicator flashing purple light
⑩ Automatic sleep: 5 minutes without using the mouse to enter sleep mode
⑪ Charging time: About 3 hours (mouse)
⑫ Attention: Only use a 5V2A charger

3)If the mouse cannot be used， how can you do？

(It shows frequently that the mouse don't response on pc /the backlight can't be light up / the keyboard can't be charged (charged and later still can't work).

Turn off the mouse. Unplug the receiver(necessary) , turn the power button to middle then press and hold the mouse scroll wheel+right button at once (3 buttons together), hold for 3 seconds. Reinsert the receiver and wait for 3 seconds, click any button or move the mouse, and the mouse will resume.

4.Product Overview

This product is a USB single-mode wired keyboard PCBA. It adopts the QK6832 solution as the main control chip. It outputs key, multimedia, and lighting effect control signals to computers, tablets, and mobile phones via USB HID, and supports HID DFU online upgrade.

5.Testing the Headset Function

1.Plug in the headset and wait for the device driver to download. The audio device should load successfully.
2.Open music to test the headset function.
3.Press the shortcut key Win + H to bring up voice input and test the MIC function.
